📺 YouTube Portfolio

PROFESSIONAL SUMMARY

Innovative and technically proficient Lead Game Developer with over 4 years of experience in game design, development, and team leadership across Unreal Engine, Unity, and Web3/Metaverse ecosystems. Specialized in multiplayer replication systems, blockchain integration, optimization, and backend orchestration. Proven success in leading multi-disciplinary teams, delivering scalable metaverse platforms, SDK systems, and advanced AI-driven game mechanics. Passionate about creating immersive worlds that combine cutting-edge gameplay, monetization, and player-driven economies.

CORE COMPETENCIES

Game Engines:

Unreal Engine (C++ / Blueprints), Unity (C#)

Specialties:

Multiplayer Replication, AI Systems, Game Physics, Animation Sequences, Cinematics

Architecture:

Observer Pattern, ECS, MVC, Onion, Server-Client Model

Backend & Web3:

Node.js, REST APIs, Azure, Blockchain Integration, NFT Mechanics

Platforms:

Steam, Epic, WebGL, Google Play, App Store

Other Skills:

Game Optimization, Quest Systems, In-App Purchases, SDK Development, Team Leadership

PROFESSIONAL EXPERIENCE

Grand Gangsta City — Senior Game Developer

📅 Dec 2024 – Present 📍 Pakistan (On-site)

- Developing large-scale open-world gameplay systems featuring crime, racing, and adventure mechanics
- Leveraging advanced proficiency in Epic's Lyra Starter Game framework to architect modular gameplay systems with scalable component-driven design patterns

EMPLOYEE SPOTLIGHT

Leading the charge in Web3 gaming and metaverse development. Proven ability to bridge technical excellence with creative vision.

HONORS & AWARDS

Employee Spotlight Of The Year
ePAGING Private Limited
July 2023

EDUCATION

Bachelor of Engineering (BE)

Computer Software Engineering

Bahria University, Karachi

2018 – 2022 | CGPA: 3.8 / 4.0

CERTIFICATIONS

- 📖 Introduction to Game Design — Epic Games (2024)
- 📖 Mathematics for Computer Games Development using Unity — Udemy (2024)
- 📖 Advanced AI for Games (GOAP) — Holistic3D (2021)
- 📖 Unity's ECS Optimization System — Holistic3D (2021)
- 📖 Python for Data Science / Tools / Foundations Level 1 — IBM (2021)

- Implementing sophisticated City Sample ecosystem integration with Unreal Engine 5, including procedurally-driven vehicle destruction physics, Mass Entity crowd simulation, and dynamic environmental interactions
- Implementing game physics, optimization systems, animation sequences, and interactive quests
- Integrating backend systems for Google Play and App Store deployment
- Enhancing metaverse-ready features including player economy and replication systems

Tech: Unreal Engine 5, Lyra Framework, City Sample, Mass Entity, Unity, C++, C#, Blueprints, Game Physics, Backend Integration

ePAGING — Team Lead, Game Designing & Development

 May 2022 – Nov 2024  Full-time

- Managed a diverse cross-functional team of Unreal, Unity, blockchain, and backend developers
- Lead architect and developer for "Apes Planet," a spatial computing metaverse hub bridging Unreal developers and gamers
- Created a custom SDK to enable user-generated content and external developer integration
- Designed and integrated blockchain-based economies, coins, and in-game marketplaces
- Built listen and dedicated server systems for scalable multiplayer hosting
- Integrated AI and ChatGPT-driven systems for immersive gameplay and NPC interaction
- Directed projects including "Crazy Battle" (PvP car combat) and "BeeCasino" (WebGL-based decentralized casino)
- Designed network architecture, integrating listen + dedicated servers for improved scalability
- Led Game-Fi and AI innovation, establishing metaverse-linked in-game economies
- Collaborated with the CEO on fundraising strategies and product direction

- ✓ Developed SDK powering external integrations for Apes Planet
- ✓ Implemented dynamic in-game currency exchange and NFT marketplace
- ✓ Enhanced player engagement via AI-assisted mission and chat systems
- ✓ Implemented advanced server-client synchronization and mini-game sub-server logic
- ✓ Integrated ChatGPT-based player engagement systems
- ✓ Oversaw end-to-end product pipelines — from ideation to live deployment

Lambda GameWorks — Game Developer (Contract)

 Mar 2022 – Apr 2022

 Creating Virtual Reality Apps — UC San Diego (2019)

ADDITIONAL INFO

- Experienced in cross-platform deployment (Steam, Epic, Android, WebGL)
- Excellent leadership, architecture design, and optimization skills
- Contributor to AI-enhanced metaverse experiences
- Fluent in English & Urdu

Developed portal mechanics, bridges, and puzzle systems for a 3D puzzle game.

Tecizeverything, Inc. — Junior .NET Developer

 Dec 2021 – Feb 2022

Integrated Amazon MWS, developed payment systems, and migrated full-stack architecture to Vue.js + .NET Core.

Bits Collision — Software Engineer (Internship)

 Nov 2021 – Apr 2022

Built a VR-based cultural heritage simulation integrating 360° stitched video environments.

Pakistan Navy – NRD (R&D Wing) — Trainee Engineer

 Nov 2021 – Jan 2022

Assisted in R&D for internal software systems and automation solutions.

SELECTED PROJECTS

- ▶ **Apes Planet** – Unreal Engine Metaverse | SDK Integration | Web3 | AI NPCs
- ▶ **BeeCasino** – Decentralized VR Casino with PvP Betting
- ▶ **Crazy Battle** – PvP Vehicle Combat Game with Reward System
- ▶ **Grand Gangsta City** – Open-World Urban Action Game
- ▶ **Metarebels TrustVerse** – Metaverse for TrustVibes
- ▶ **Arcade AI 3D** – AI Neural Network-based 3D Simulation
