WORK EXPERIENCE

Professional's World

March, 2025 - Present

Technical 3D Artist

Karachi, PK

- Developed a high-fidelity 3D architectural experience optimized for Unreal Engine.
- Utilized advanced Procedural Content Generation (PCG) techniques for dynamic building creation and implemented complex landscape materials with runtime virtual texturing for enhanced performance and visual fidelity. I led level design and lighting setup for look development, ensuring cinematic quality.
- I built a fully interactive application using Blueprint scripting and advanced widget-based UI.
- The project was successfully deployed for web access via Pixel Streaming, enabling real-time user interaction across platforms. This work bridged design, technology, and user experience seamlessly.

Darul Solution

April, 2025 - May, 2025

VR Developer

Karachi, PK

- Unreal Engine Developer at Darul Solution, responsible for advanced Blueprint scripting in a live configurator project.
- Developed interactive features enhancing user experience. Worked on a mixed reality VR application, delivering architectural visualization solutions.
- Ensured seamless VR integration and real-time rendering to support design workflows.

ONN Works

Dec, 2023 - Jan, 2025

Technical 3D Artist

Karachi, PK

- Created and optimized realistic 3D models and textures of various environment assets, props and organic objects
- During the process, performed various steps involved in a 3D pipeline including Sculpting, Rigging, UV editing and PBR texturing and integrated them into various Render engines including Unreal and Unity3D.
- Also worked on Lighting, Rendering, Look-Dev and VFX for post production.
- Developed 3D house mechanics using UE5 & C++ for an architectural Configurator.

Horizon Ventures

Aug, 2022 - Aug, 2023

Technical 3D Artist

Karachi, PK

- Led technical art aspects of "Kaaf," a third-person action RPG set in ancient times. Collaborated with the art team for seamless integration of visuals and functionality.
- Created and maintained the art pipeline, utilizing tools such as Blender, Maya, Substance Painter, Substance Designer, and more.
- Stayed updated with industry trends and developments in game development and Unreal Engine.
- Developed a 3D first-person shooter game from inception to completion, taking charge of gameplay mechanics, AI, level design, and UI implementation.
- Designed and implemented engaging gameplay mechanics, including player movement, weapon handling, enemy AI behavior, and interactive elements, to create an immersive and thrilling gaming experience.

EDUCATION

UBIT, University of Karachi

Feb, 2022

BS, Computer Science

Khi, PK

GPA: 2.9

FYP: HalalScan – A blockchain based barcode meat scanning application to ensure that the meat is Halal or not

SKILLS & INTEREST

Tools & Skills: Unreal Engine; C++ Development; Blender; Substance Painter; Substance Designer; Marvelous Designer; Gaea; Davinci Resolve; PCG; Game Mechanics Development; Shaders; Level Design; Cinematics Design; Animation Retargeting; Texturing; Git; Perforce; Devops;

Interests: Gaming; Artificial intelligence; Robotics; Cricket;
